AMENDMENT

In response to an Office action dated August 14, 2002 please amend the above-identified application as follows:

IN THE SPECIFICATION:

Please replace the paragraph beginning at page 2, line 27 with:

Q' An advance in the art is achieved with an arrangement that employs the notion that a failure at any point in the network can be quickly remedied by rerouting traffic at the failed point though network elements in close topological proximity to the failed point. This is accomplished by algorithmically and distributively assigning the responsibility for recovery from all failures to different network nodes. In one illustrative embodiment, each failure is assigned to one primary command node, and to a secondary, backup, command node.

IN THE CLAIMS:

1. A communication network that includes nodes and link bundles that interconnect said nodes, where said link bundles are carried over physical spans of transmission facilities, the improvement in each of said nodes comprising:
